# DoD Records Management

Mark Patrick, DoD Records Officer

"The appearance of U.S. Department of Defense (DoD) visual information does not imply or constitute DoD endorsement." (Cleared for open publication 17 May 2023, added graphics cleared for open publication 22 May 2023 in [DoD Records Strategy](#). [DoDM 8180.01](#) cleared on 4 August 2023.)

UNCLASSIFIED

# Agenda

- Intro
  - What does the DoD information universe look like?
  - What is my role?
- DoD Records Strategy
- DoDM 8180.01
- Where we're headed with MS365...or DoD365
- Final thoughts – Compliance as an operational/business enabler, not an outcome/end state

Army Cpl. Daisy Chikwanha, an AH-64 helicopter repairer assigned to the 1st Battalion, 3rd Aviation Regiment, 12th Combat Aviation Brigade, inspects an Apache helicopter during Exercise Swift Response 23 at the Stefanovikeio Airport in Greece, May 9, 2023. Photo by: Army Sgt. Maria Henderson

# DoD Records Office

- The DoD Information Universe
- DoD Records Officer role
  - Strategy, Policy (DoDI 5015.02—currently under review), Procedures (STD->Manual), DTM 22-001
  - Managing a collaborative community
  - Aligning under a network of SAORMs
  - New full-time records officer in the wake of the 3 August 2022 Deputy Secretary of Defense memorandum regarding text message preservation—cascading events. Public IG report on phone app usage... Opportunity?
  - Designated ARO by DoD CIO on 13 April 2023
  - Alignment with DoD Data Strategy and new Chief Digital AI Office

Air Force Capt. Samuel “RaZZ” Larson, F-22 Raptor Demonstration Team commander, flies at high airspeeds during an air show at Joint Base Langley-Eustis, Va., May 7, 2023.

"Deploying the full spectrum of DoD Information for Decision Advantage"

# DoD Records Strategy

- First ever DoD Records Strategy signed by Deputy Secretary of Defense 10 May 2023, approximately 27 pages
- Implementation process is underway (5-year notional journey)
- Publicly released (DoD CIO Library page)
- “Will require leadership from chief information officers to implement DoD-wide strategies to achieve digital modernization and information-related capability goals”
- Goals: Curation, Automation of Records Processes, and Governance of Records Across the Lifecycle
- Several key enablers and approaches to goals are presented
- Integrated with data strategy

**CURATE**

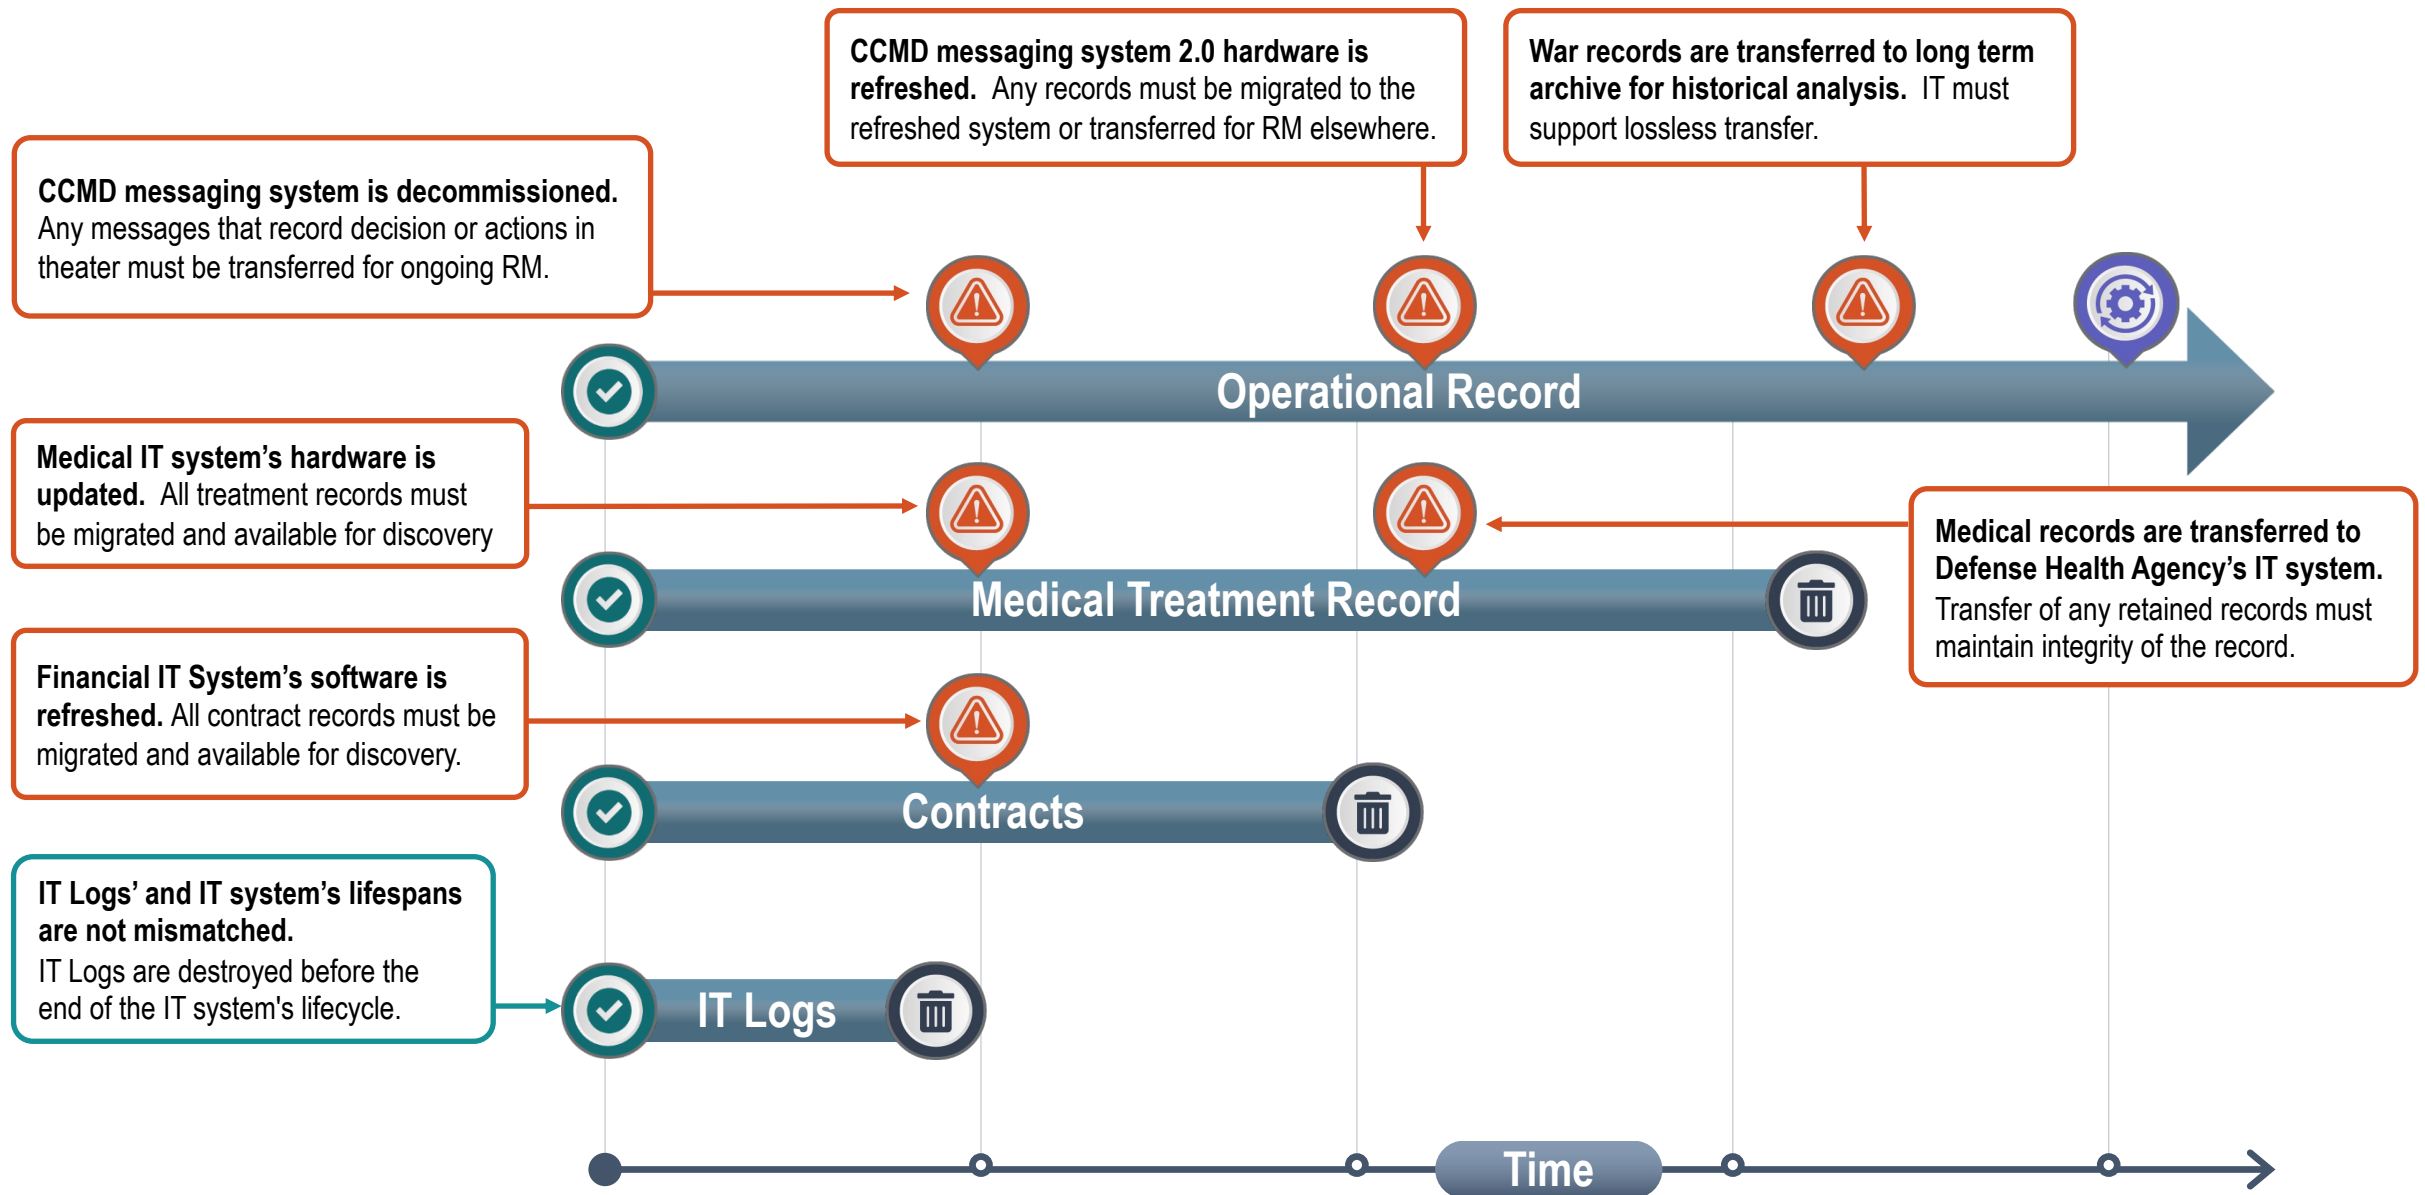

**AUTOMATE**

**GOVERN**

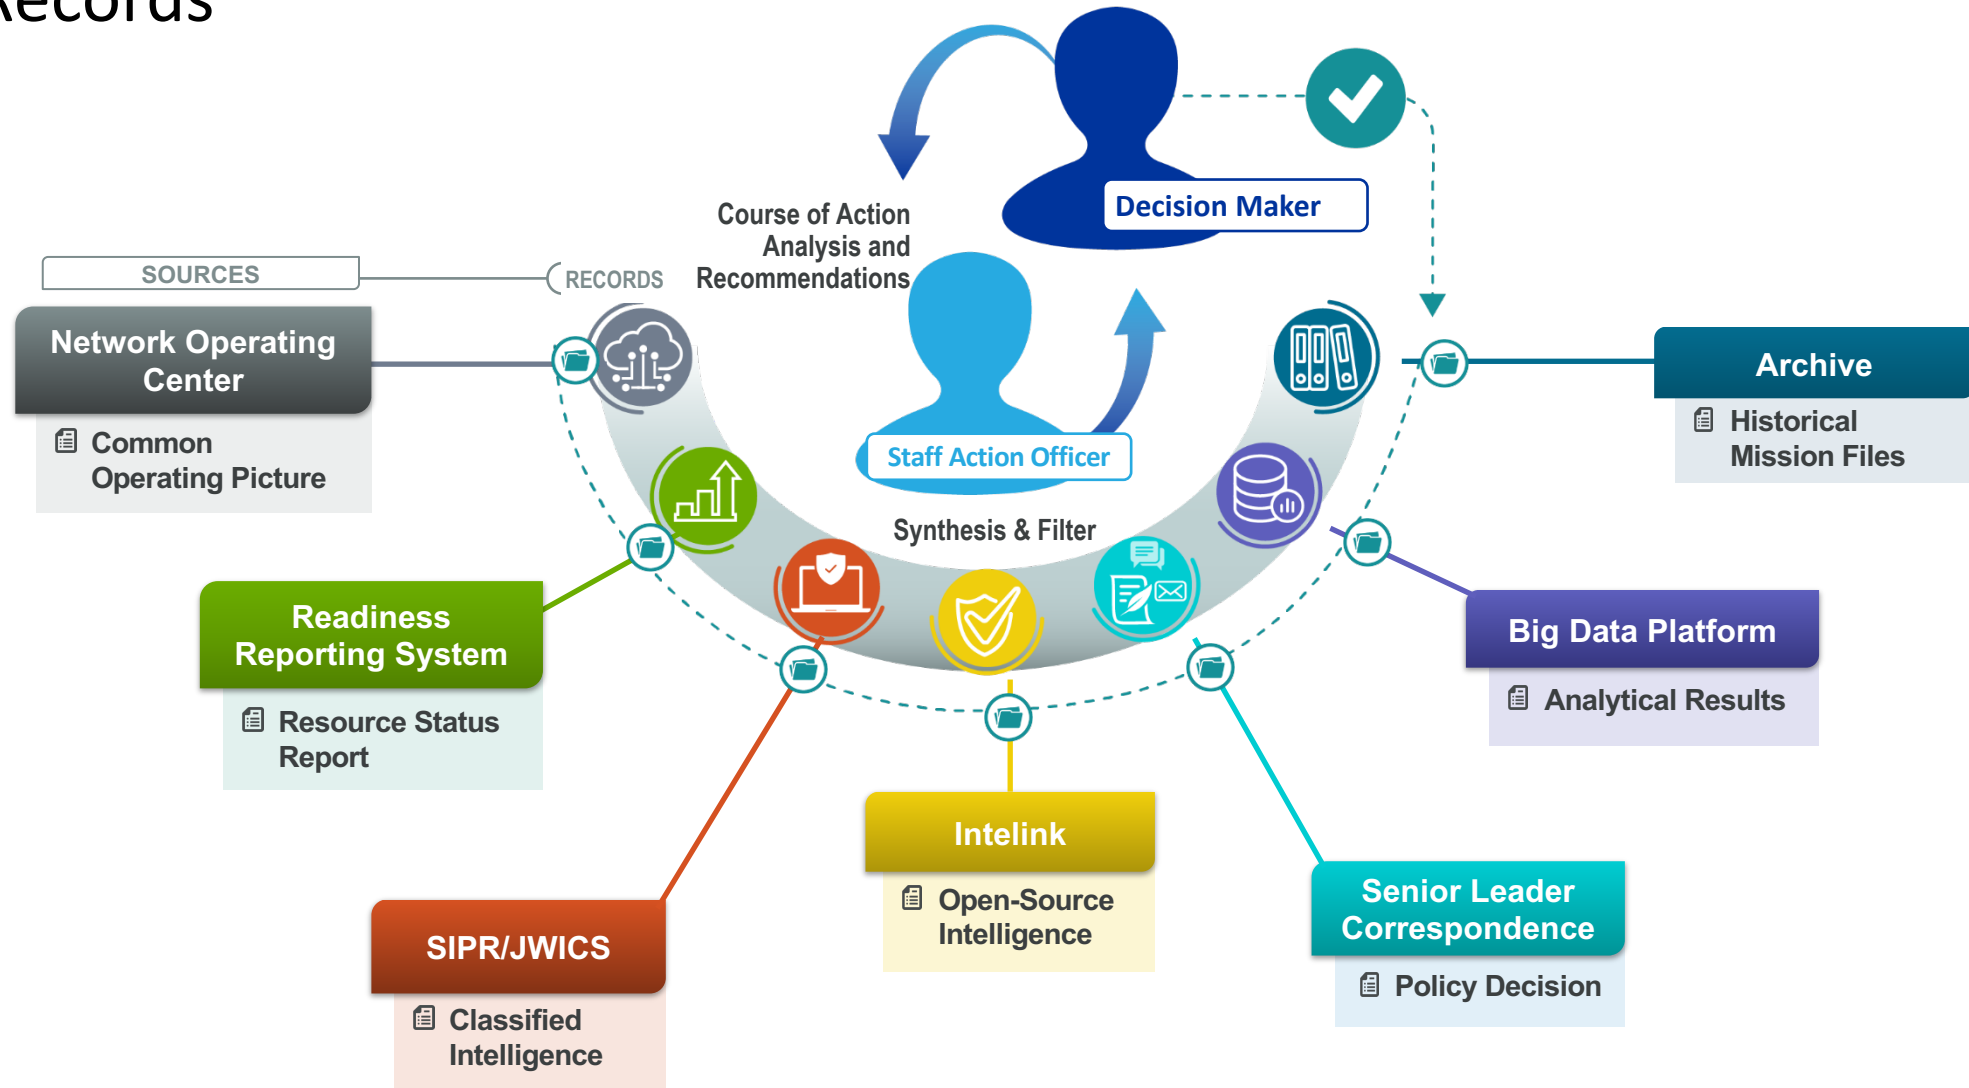

**Legend:**

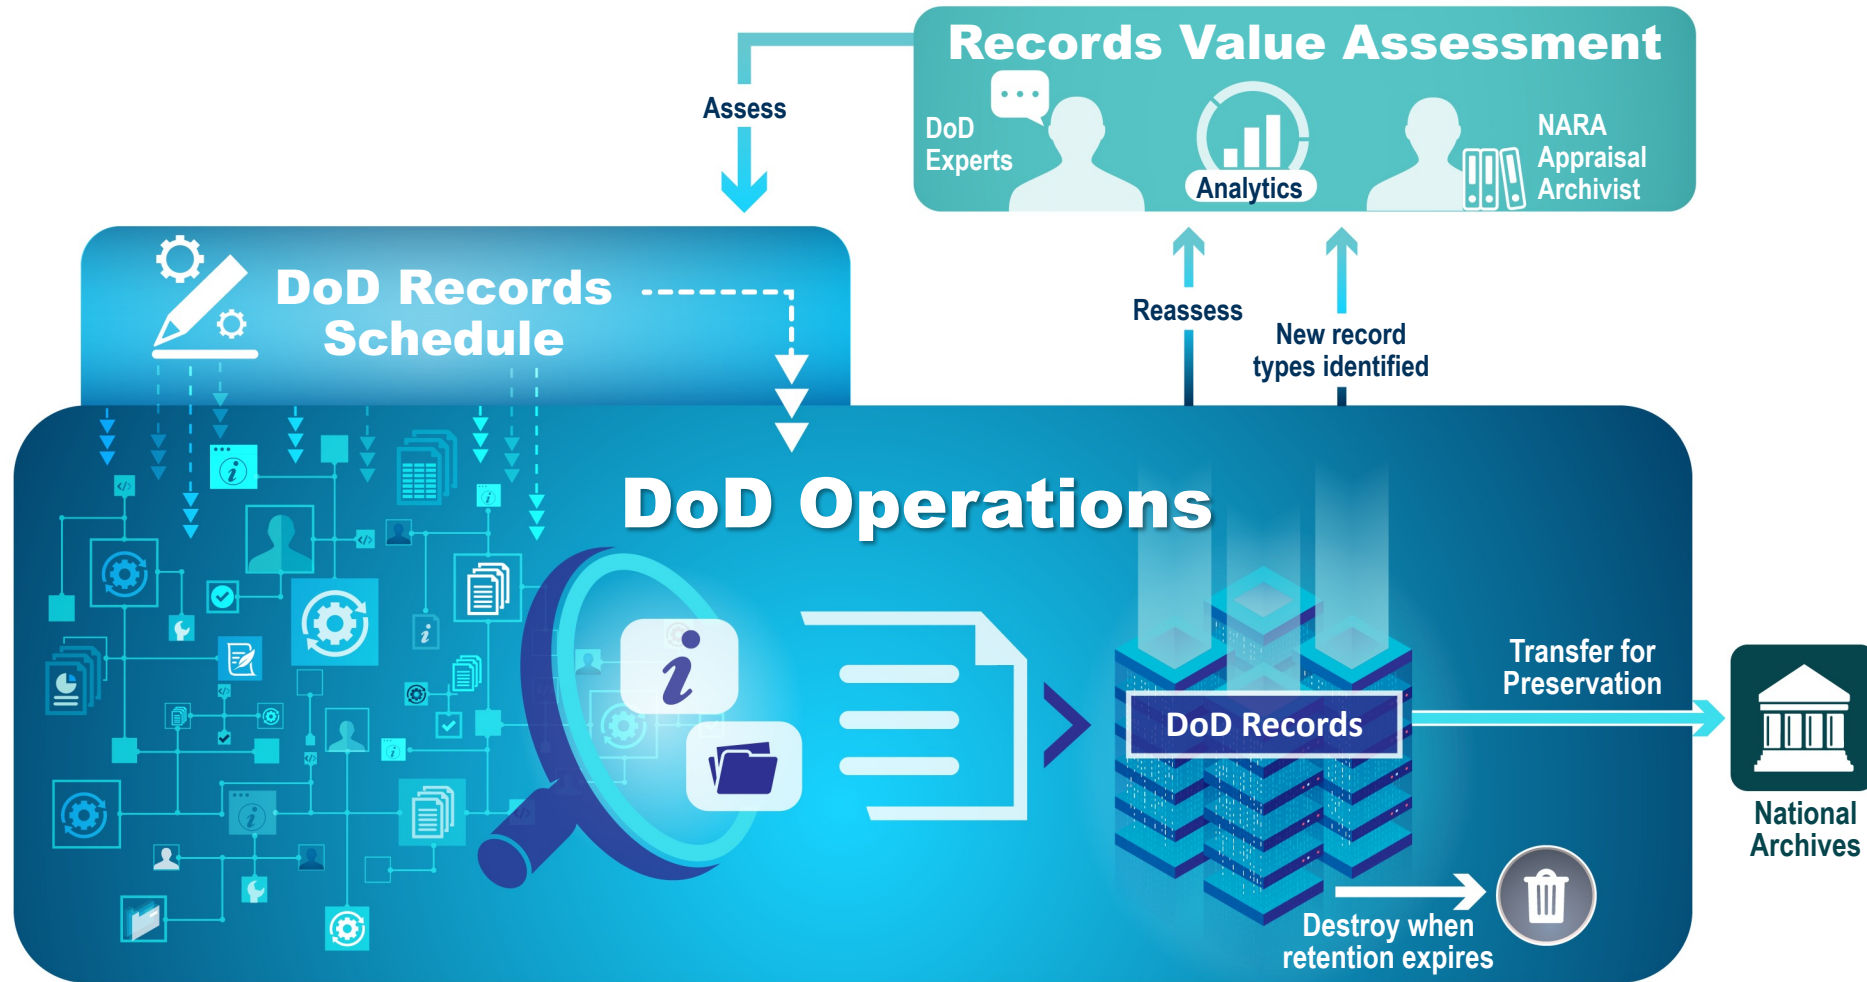

- Mismatch between Records & IT Lifespan
- Creation
- Destruction
- Transfer to NARA
- Record Lifespan
- IT System Lifecycle Event

**PAST**

DoD Manual

"IT Planning  
for ERM"

## DoD Manual "Information Technology Planning for Electronic Records Management"

- Scoped to specific guidance needed for ERM
- Provides a foundation for next generation of compliance and federation
- Replaced DoD 5015.02-STD (4 August 2023)

Electronic  
Records  
Management  
**GUIDEBOOK**

## Electronic Records Management Guidebook

- Provides in-depth and industry best practice guidance for ERM
- Sets principles and vocabulary for ERM within the larger DoD IE
- Sets forth a federated view of ERM in DoD
- Addresses ERM within DevSecOps

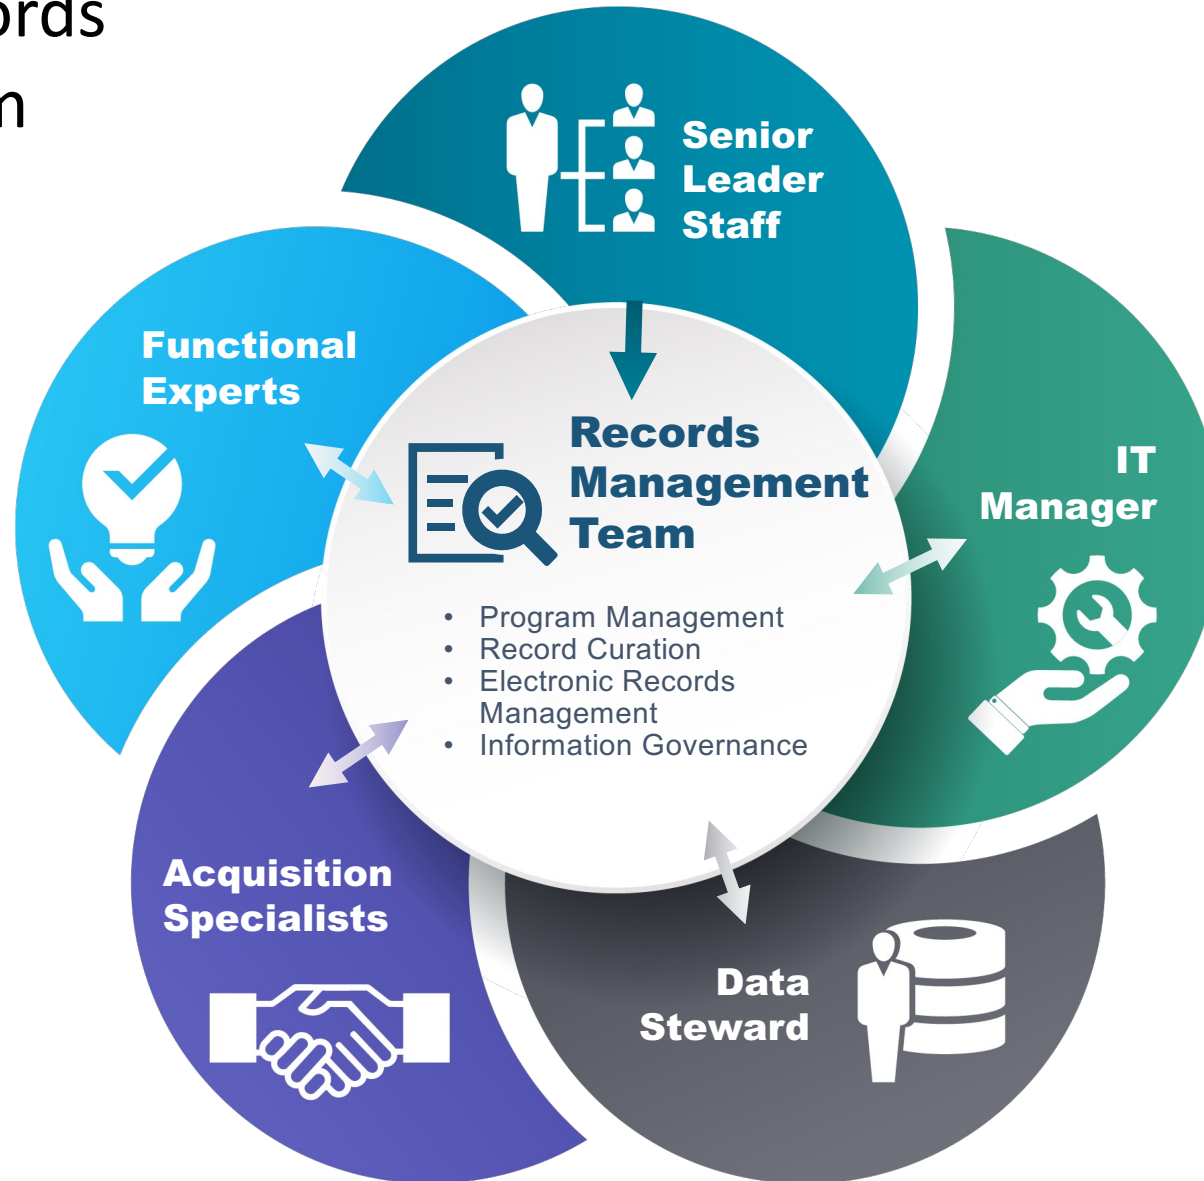

Electronic  
Records  
Management  
**PLAYBOOK**

## Electronic Records Management Playbook

- Provides a set of actions or plays for addressing ERM in DevSecOps
- Scoped to specific guidance needed for ERM
- Possible plays include "Recruiting the ERM Team," "Writing the Data Retention Plan," "Meeting Federation Requirements," and "Planning for Transfer to NARA"

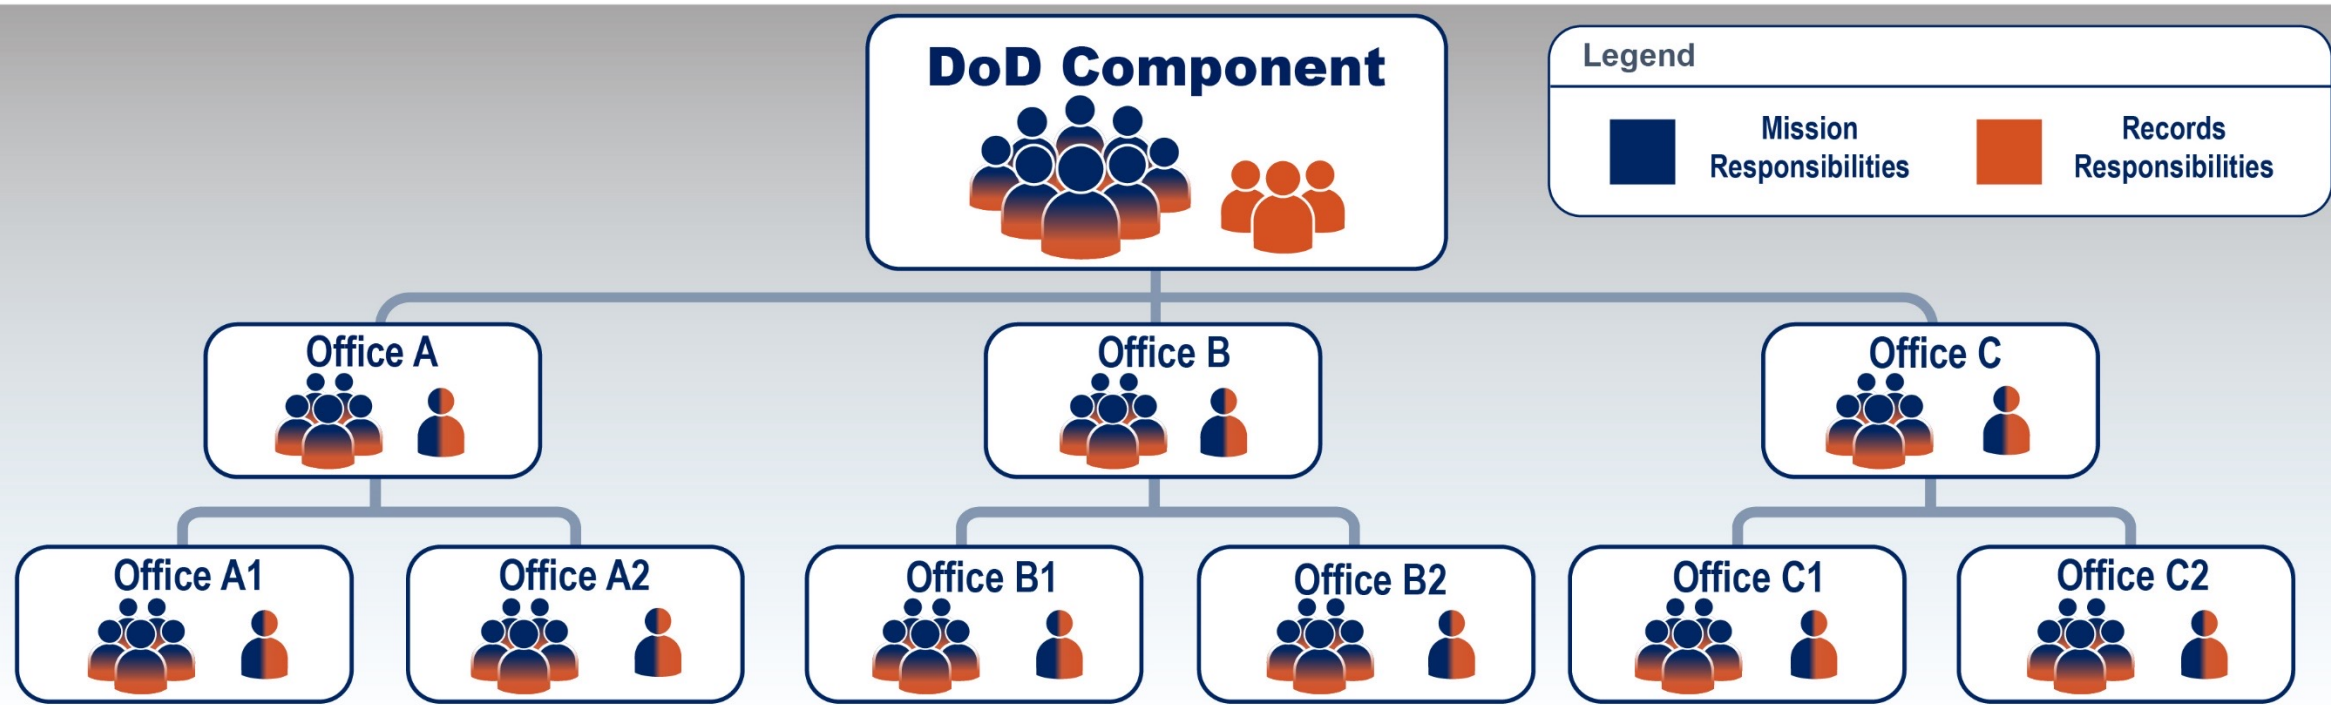

**FUTURE**

CURRENT

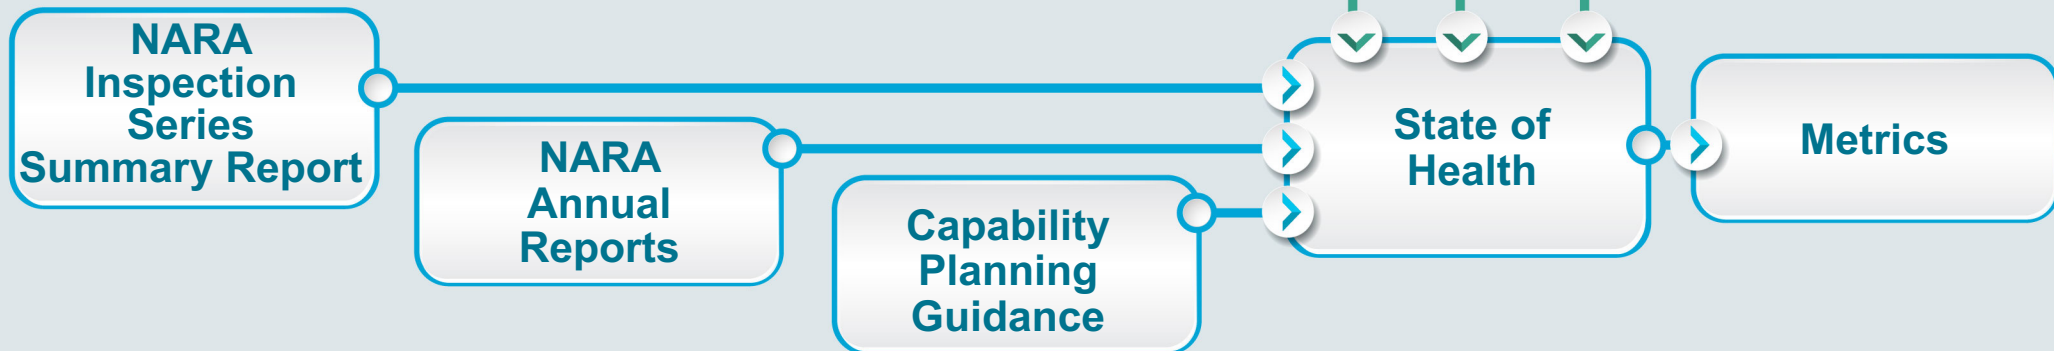

FUTURE

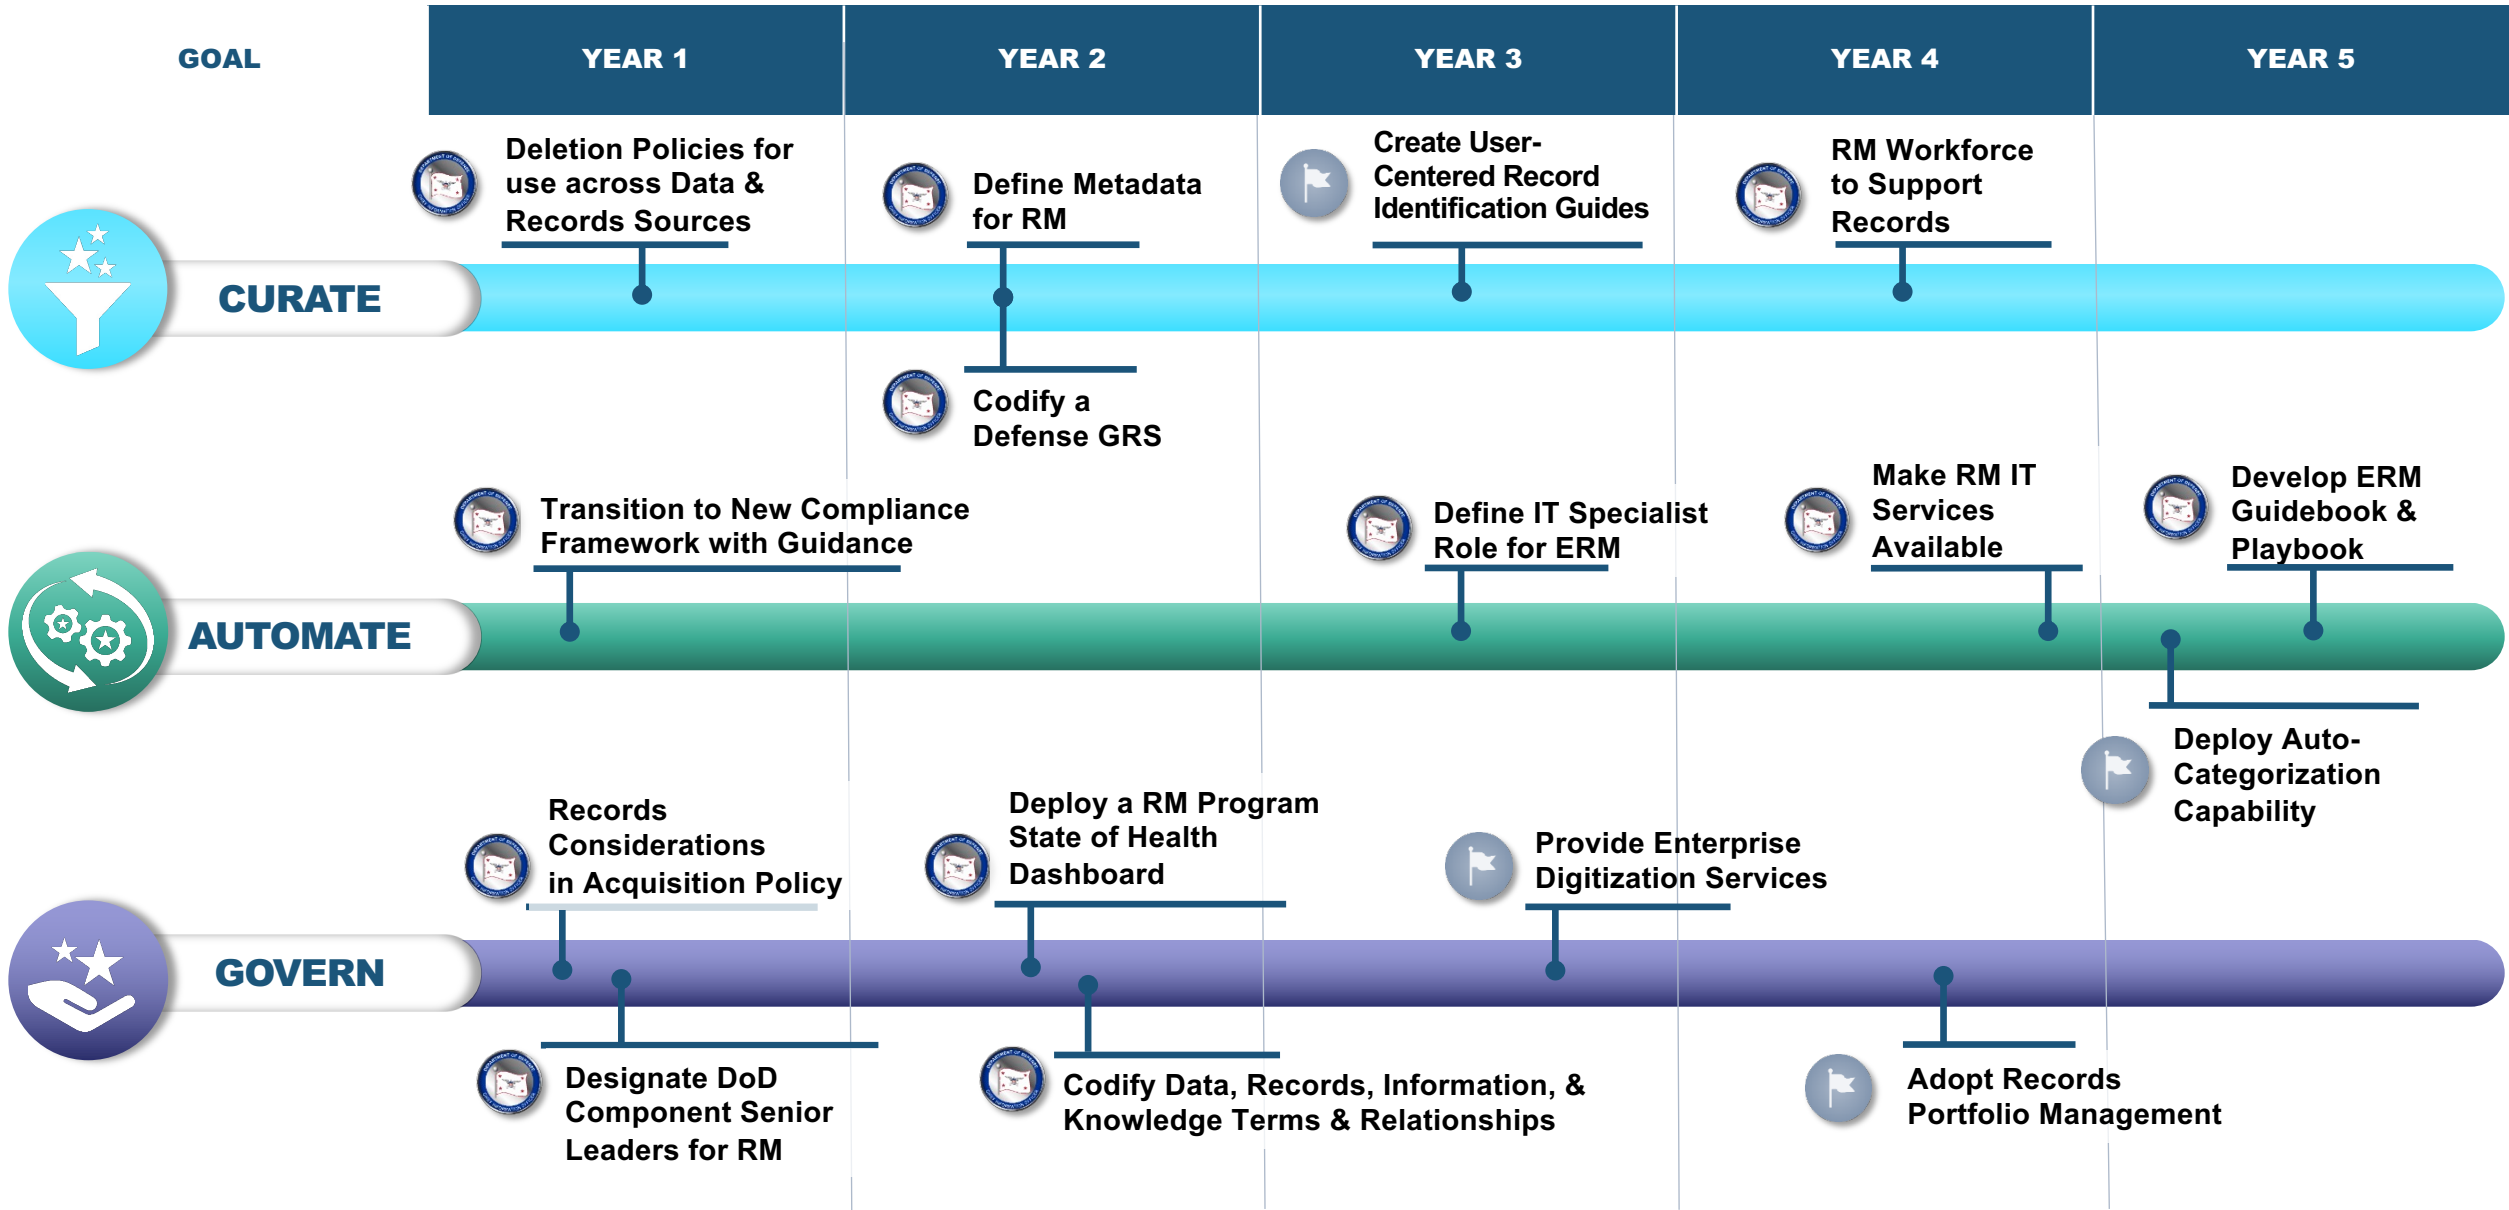

## POLICY

## OVERSIGHT

## ADVOCACY

Office of Primary Responsibility: **DoD CIO**

Office of Primary Responsibility: **To Be Determined**

# DoD Manual 8180.01

- “Information Technology Planning for Electronic Records Management”
- **Purpose:** In accordance with the authority in DoD Directive (DoDD) 5144.02 and DoD Instruction (DoDI) 5015.02, this issuance implements policy, assigns responsibilities, and provides procedures specific to electronic records management (ERM) for DoD information technology (IT) acquisition, configuration, implementation, and maintenance of IT systems and services.
- Signed by the DoD CIO on 4 August 2023
- It **replaces the DoD 5015.02-STD**, “Electronic Records Management Software Applications Design Criteria Standard”
- New 8000 series issuance reflects IT focus
- Many of the **values** of the original standard don’t change
- Primary audience is the IT Provider and calls for inclusion of Records Officers in the process
- This manual is publicly available via the Washington Headquarters Services Directives web site. Search on DoDM 8180.01

# DoD Manual 8180.01 (Continued)

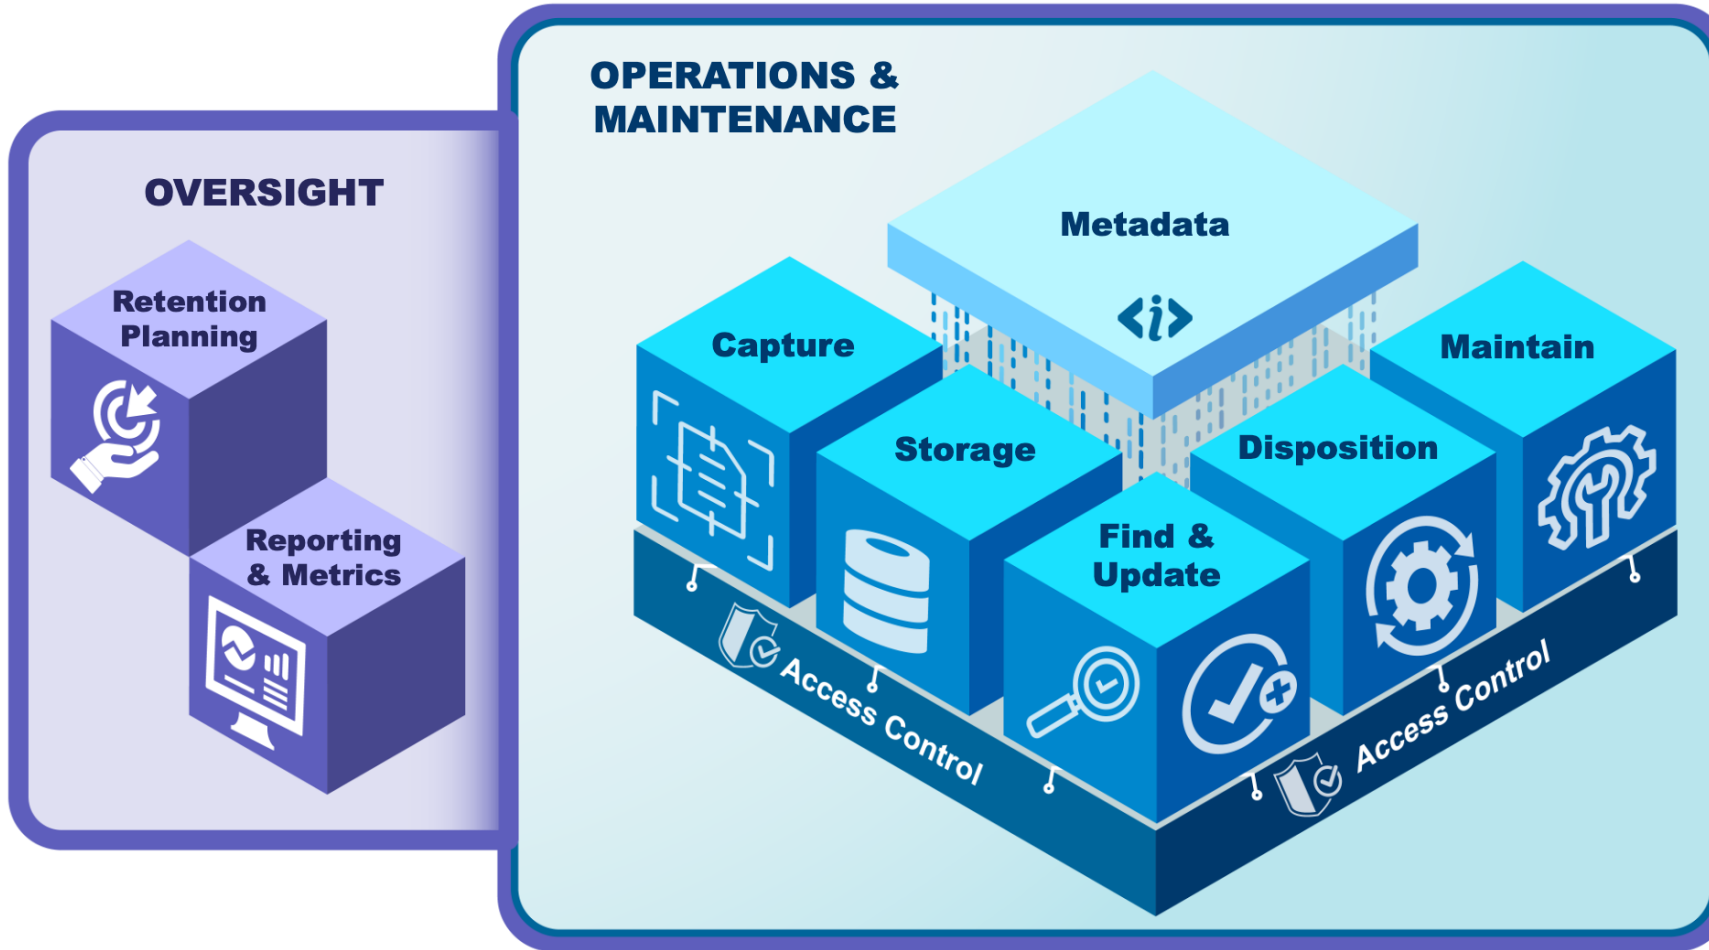

- Paradigm shift focusing from ***certified*** software to ***effective deployment*** of software
- 88 pages, technical
- 14 Sections

Section		Section	
1	General Information	8	Find and Update
2	Responsibilities	9	Disposition
3	Overview	10	Maintain
4	Retention Planning*	11	Access Control
5	Metadata	12	Reporting and Metrics
6	Capture	13	RM Outcomes Checklist
7	Storage	14	Required Functionality

\*Includes sample data retention plans for purpose-built IT systems, utility IT systems, and purpose-built IT systems that contain operational records.

# DoDM 8180.01 ERM Technology Building Blocks

- Focus on unique considerations and requirements for ERM
- Technology Perspective is composed of nine building blocks.
- DoDM provides for each building block:
  - Overview
  - Inputs
  - Considerations
  - Outcomes✓

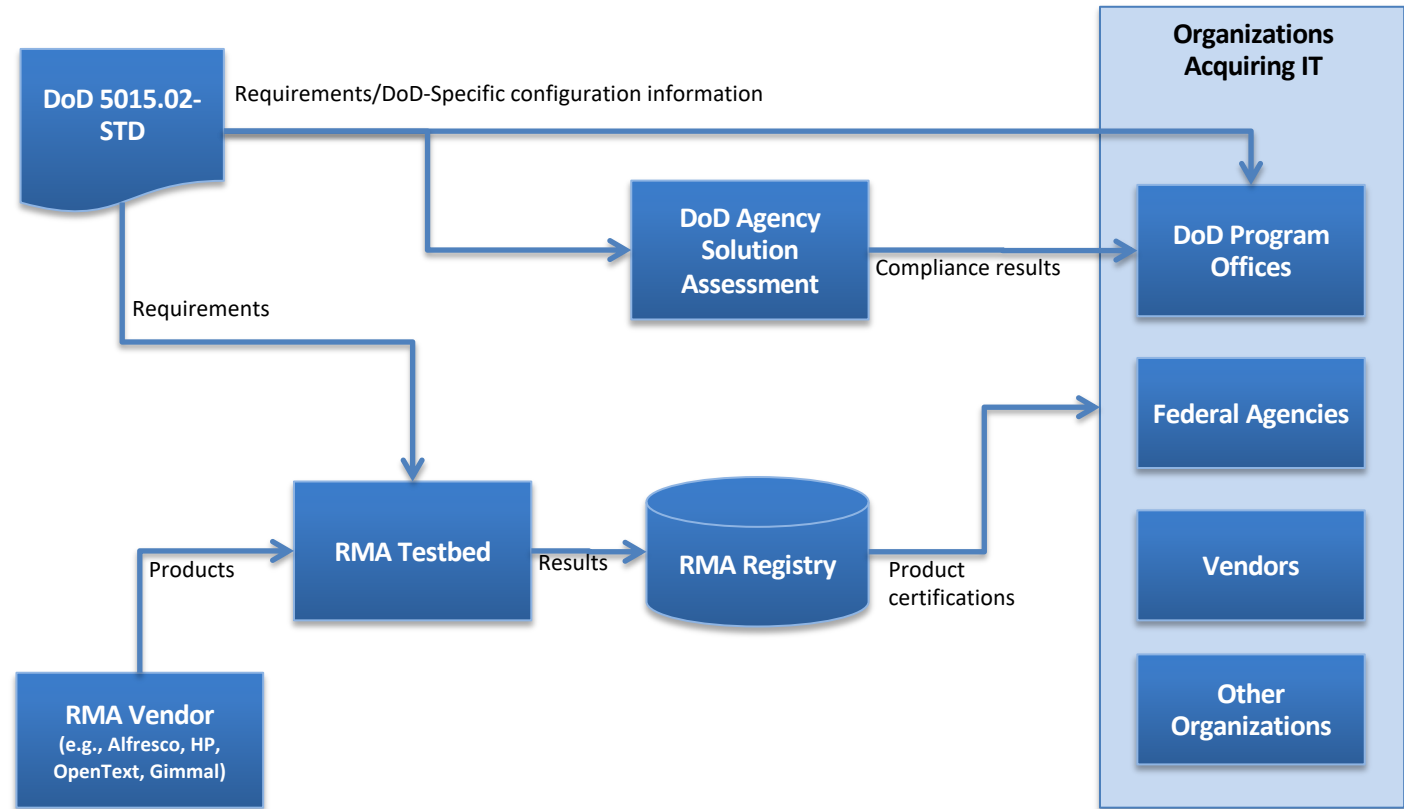

# DoD 5015-STD Has Provided Baseline Requirements

DoD 5015.02-STD has:

- Facilitated industry evolution to providing RM solutions
- Provided a test baseline for vendor product compliance
- Provided a baseline of requirements for government IT acquisition and development
- Documented RM functionality and metadata for managing all records, classified records, and support for FOIA and Privacy Act

*For over 25 years, the DoD 5015.02 Standard has provided the RM community from industry to government with clear documentation of requirements for electronic records management.*

# The Landscape Has Changed

- Shift from a dedicated Records Management Application to **IT solutions**
  - Many IT components are sources of records and can perform some RM functions efficiently within the Component
  - RM compliance is achieved across a solution composed of a set of IT components of that touch a dataset, information product, or record
- Shift to **cloud** solutions bring major considerations:
  - Make sure that access to the records is available for records management, legal holds, and discovery
  - Provide capability to "losslessly" move information and its metadata into and out of the cloud
- Shift from an afterthought to a **holistic approach**
  - DoD information and data are record information of different retention time periods, from transitory with a retention of 6 months or less to permanent records to be preserved for the life of the Republic
  - Planning for RM throughout the information lifecycle provides an opportunity for more automation and less burden on the endpoint user
- Shift from a standalone publication to **more integrated guidance**
  - Within DoD, DoD 5015.02-Standard has been used primarily by a small set of IT-focused RM professionals
  - For the most impact, the reissued guidance will be designed to work synergistically with other DoD guidance and provide tools for use across a wider audience
  - Opportunities for references from other guidance will be pursued where useful

*Significant changes in technology, acquisition processes, and DoD guidance warranted significant changes as the DoD 5015.02-Standard is reissued.*

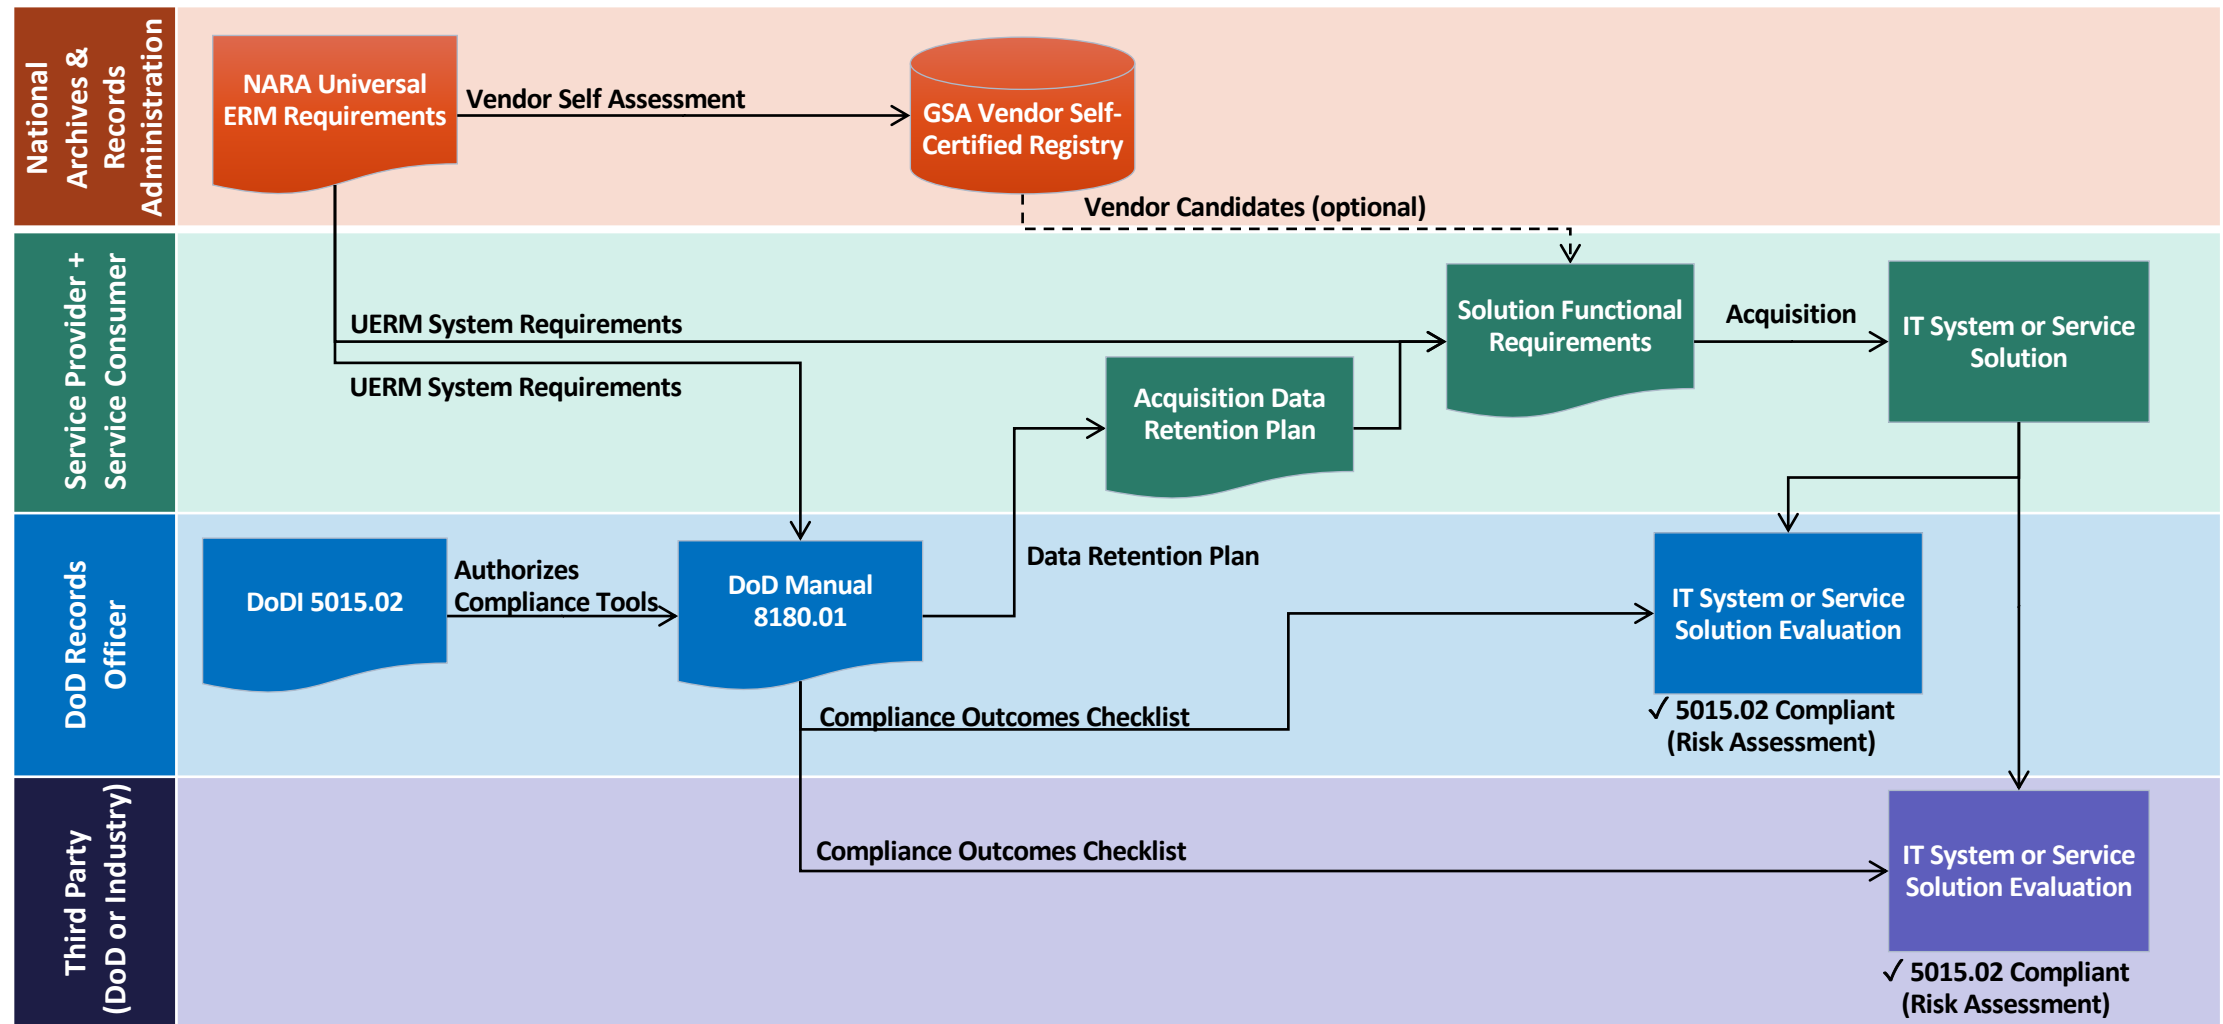

# Vision for DoDI 5015.02 Compliance Framework for IT Systems and Services

Policy foundation for the vision:

- DoD **Instruction** 5015.02, “DoD Records Management Program” sets RM policy for DoD and is authorized by the charter of the DoD Chief Information Officer (currently under review)
  - Electronic records are to be managed in an IT system or service that is compliant with DoDI 5015.02 throughout their lifespan.
    - For records of long-term or permanent value, their lifespans may cross IT systems and services boundaries
    - All IT systems and services that contain records must be compliant
  - DoDI 5015.02 ERM compliance is an assessment of risk to DoD records by the use of IT system or service
- DoD **Manual** 8180.01, “Information Technology Planning for Electronic Records Management” was developed to provide guidance for IT acquisition on RM-specific considerations.
  - Tools from the DoDM 8180.01 can be used to inform acquisition along with the Universal Electronic Records Management Requirements (UERMs) published by NARA.
  - The DoDM 8180.01 provides the tools for third party organization, either DoD or industry, to execute the assessment process.
  - The purchase of a product does not provide compliance; therefore, the deployment of an IT system or service must be assessed.

# Vision for DoDI 5015.02 Compliance Framework for IT Systems and Services (cont.)

# Guiding Considerations

- The key success factor for this manual is getting it into the hands of a wider audience including the ***IT and Acquisition communities***.
- This manual aligns with NARA's Federal Electronic Records Modernization Initiative (FERMI) including mapping to the UERM with more specific extensions expected.
- This manual will be consistent with the principles and guidance set forth by the International Organization for Standardization (ISO) and IT Infrastructure Library (ITIL). DoD-specific considerations will be the focus of the DoDM.
- This manual will be more technology agnostic in order to match its contents to the lifecycle of DoD Issuances.
- An IT Compliance Checklist is a key section of the DoDM providing a tool for auditing an IT component, service, or system of application compliance to DoD RM requirements.

# Where we're headed with MS365

- 14 active tenants in DoD365 unclassified cloud environment managed by the Defense Information Systems Agency (DISA) Defense Enterprise Office Solution (DEOS) Program Management Office (PMO).
- Multiple tenants and security domains complicate the use of information governance features of 365 across the DoD enterprise, however, efforts are underway which include DISA, Microsoft, and 3<sup>rd</sup> party consultancy to optimize the use of the platform's governance features.
- DoD CIO is running a recurring 365 RM Tiger Team as part of roll-out which is evolving to be part of a larger IT governance framework.
- Non-365 electronic RM is more of a mixed bag, as well as security domains where 365 isn't deployed

# Final thoughts

- Compliance as an operational/business enabler, not an outcome/end state—why does it matter?
- The critical evolution of the RIM team
- Navigating the “digital Tower of Babel”—dialects, vocabulary, Venn diagrams, and the dangers of SME silos

Air Force Staff Sgt. Aaron Ray scans an electronic shelving label in a warehouse at Eglin Air Force Base, Fla., April 11, 2023. The electronic labels have saved the warehouse staff thousands of work hours by streamlining their storage procedures.
