

Unlocking the power of your agency's unstructured data with AI

Rand Wacker, VP Product Strategy, Box
Wyn Elder, Managing Director Federal Government, Box

US Forest Service

Enabled 35K+ remote employees and 10K+ seasonal employees to digitally manage forest fire operations

Securely shared and signed loan and insurance documentation from one compliant workspace

U.S. AIR FORCE

Enabled aviators with secure collaboration and real-time access to information in the field

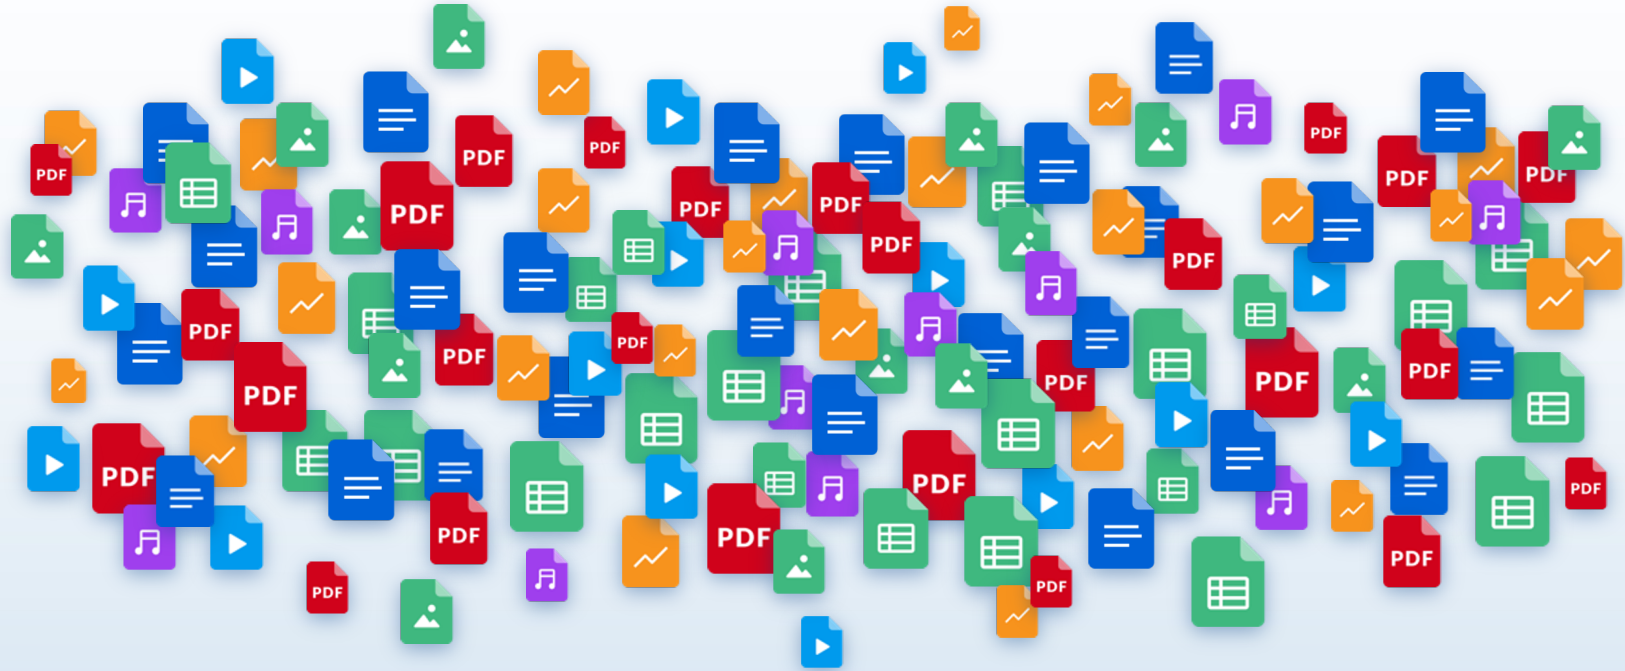

The Content Cloud

A secure, intelligent platform
for the entire content journey

Why is AI different now?

Transforming how we work with unstructured data

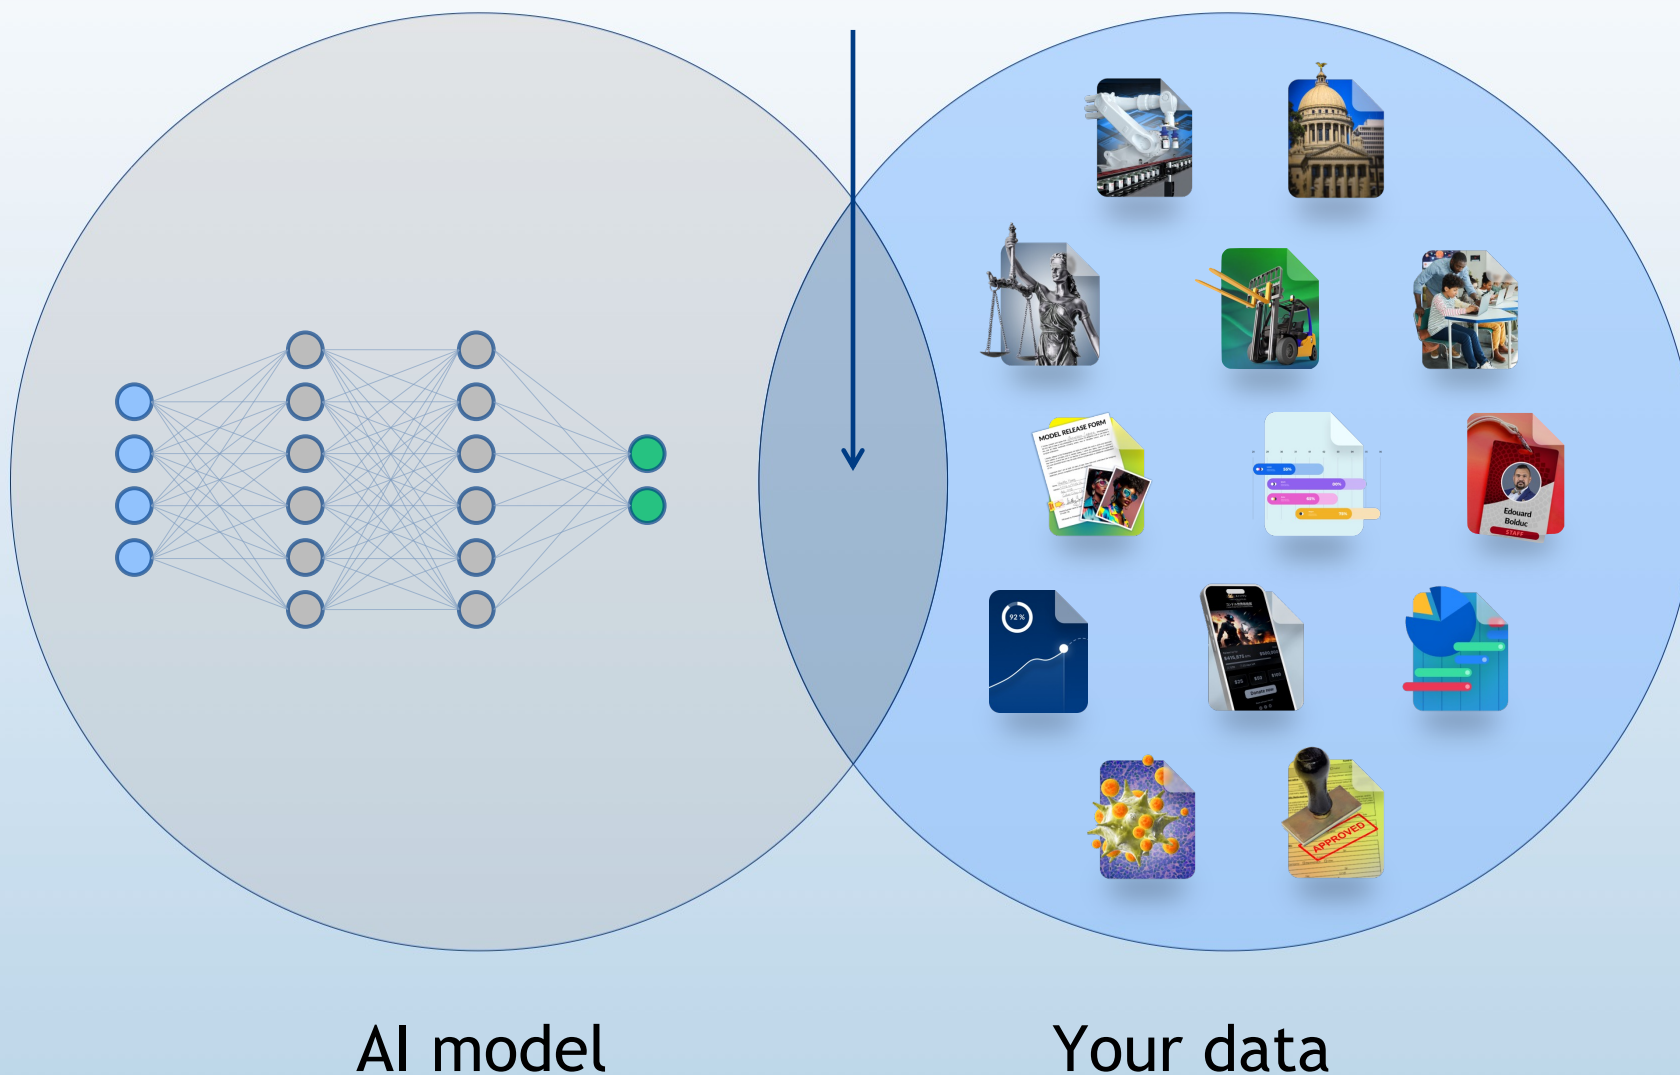

10%

Structured data

90%

Unstructured data

Real enterprise AI value

Box's AI Principles guide our commitment to security, compliance, and privacy

Full Control

- Enterprises are in full control of AI usage, can turn usage on/off in the Admin Console, and choose which user groups get access

Security & Privacy

- AI models will not be trained with customer content without explicit approval
- AI systems will adhere to Box's strict user access controls and permissions to prevent authorized access or unintentional data leakage
- Robust encryption protocols to safeguard customer data
- Ensure that our AI systems do not compromise privacy, security, or compliance with applicable regulations

Transparency

- Box will be transparent about our AI practices, algorithms, vendors, and data usage
- Box will provide explanations of AI output, wherever reasonable
- Box will maintain logs of AI system activities to allow for easy resolution of issues

We will evolve our offering based on our assessments of trust and quality from our vendors.

Enterprises need an architecture that:

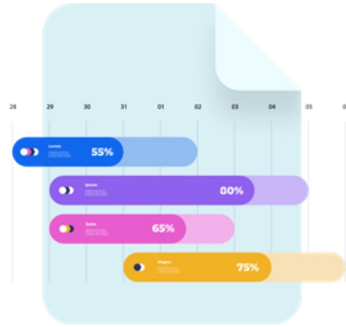

- ✓ Has granular access controls
- ✓ Embeds enterprise-grade security
- ✓ Ensures model isolation
- ✓ Works on every content type
- ✓ Supports any AI model

One platform for your agency using Box AI

Training

Quickly review training documents for insights to tweak & optimize curriculum

Logistics

Derive insights from across supply chain documents, including POs, invoices, contracts and NDAs

R&D

Amp up productivity by analyzing large scientific documents for relevant data & insights

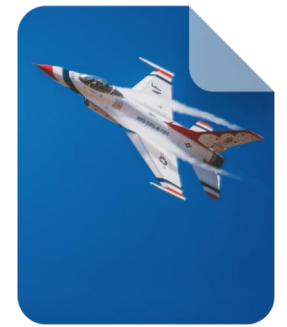

Legal

Instantly query and derive insights from lengthy legal documents & case files

HR

Improve productivity by enabling employees search HR policy documents and procedures for answers; accelerate Claims processing

Mission ops

Rapidly search and organize citizen submissions for faster processing (patents, grants, loans, etc.)

Thank you
